

Laura Venecia Rodriguez

12/15/1954

Personal Year = 7 Life Path = 1 Attitude = 9 Birthday = 6
Destiny = 1 Soul Urge = 3 Personality = 7 Power Name = 5
Intensity Number = 9

Hello Laura! ...and welcome to your **Numerology Report!**Above you'll see your *Numerology Chart*, with all your **Numbers**. This way you can see them all at a glance. It's useful to look at it as a *Whole* this way...

As you can see, there's a predominance of 3s, 9s & 6s ...Those are from the **3 – 6 – 9 Numbers Group: Communication and Creativity...**

I like to start off with the *World Year Number* (sometimes called the *Universal Year*), which is not part of your Chart, but everyone on the planet is under the influence of...

We are currently in a **World Year of 7 – A Magical and Spiritual Year!**

In a *World Year of 7*, we feel drawn to connect with our spirituality, our antenna is up where our intuition is concerned. We may venture out attending workshops and find people who are like-minded. If there is research to be done, this is the year. What about that genealogy project you have thought about or researching something you dreamed of?

In a 7 year we can often live in our head a bit too much and need personal space. Just don't hermit in too long and once you've had your space, get back into the game. Find time to listen to music, take walks in nature and being near water can be very comforting and healing. 7 is a *magical and mystical number*; there is mystery in the air this year!

Continued...

In addition to the *World Year Number*, each of us is somewhere in our 9-Year *Personal Year Cycle*You are in a ***Personal Year of 7!*** ...Which is in alignment with your *Personality Number*.

As you know, you are one of those rare individuals whose *Personal Year Number* aligns with the *World Year Number*, **every year!** 🤖👍 It sure makes it easier to keep track!

Because this year's PYN is in alignment with your *Personality Number*, this is a good year to allow others to see more of "the real you". Especially in regard to your spirituality, psychic ability, and other areas you are passionate about.

Your ***Life Path Number is 1!*** ...Arguably the most important *Number* in your *Chart*, The *Life Path* is derived from your full Birth Date. I liken it to your *Sun Sign*, in Astrology.

ONES are independent, self-motivated, and hard workers. They have a strong desire to be **#1**. They are critical of themselves and as a result, can be critical of others. When the 1 Life Path has won a personal victory, their face radiates with pure joy.

Multitasking is something they tend to be very good at, and keeping busy is important to them. The 1s will not tolerate laziness from the people they spend their time with.

Your ***Attitude Number is 9!*** ...Derived from your Month and Day of Birth, The 9 is the leader. At work they'll not just do their job but everyone else's. That's the *Attitude Number 9*: show me what to do, I'll do it. When it's over, they're exhausted and drained, but rarely allow themselves to tell the people responsible.

They need to establish boundaries so that they will not feel depleted by the people in their life. *The Attitude Number 9* may have old family pain that haunts them, and the 9 must work through these emotions in order to be happy today.

Continued...

Your **Birth Number is 6!** ...Obviously your Day of Birth, this number symbolizes Venus. People born on the 6th 15th and 24th are extremely magnetic and adored, determined in carrying out their plans, artistic, entertaining, loving, romantic, affectionate, fond of music, paintings and anything that is rich. Great power of making friends but cannot stand jealousy.

They appear as a born nurturer; someone who carves love, friends, and companionship. When a 6 Birthday walks into a room, you will feel their presence immediately. They have a dynamic energy. The world sees them as a solid personality, very responsible and capable of managing other people. A 6 Birthday instinctively knows how to deal with children, and pets usually respond to them with instant affection.

Like your *Life Path Number*, your **Destiny Number is also a 1!** ...This *Number* comes from your full Name at Birth. Before you leave the planet, your destiny is to be number 1 at what you do.

You are a leader and need to be in charge. You push yourself the hardest and strive to be the very best at everything you attempt. When you have achieved one of your major goals, teach yourself to take time out and really enjoy the moment. With Destiny Number 1, you will have all the time you need to realize your dreams.

You must remember you are only human; it's OK to make mistakes on your way to achieving excellence. It would be wise to center your enormous energies – try Yoga, or any of the other Eastern schools of meditation to achieve inner serenity....

Your **Soul-Urge Number is 3!** ...This is derived from the Vowels in your Birth Name.

My 3 soul is fulfilled when I am laughing, performing, writing, or using my creativity in a significant way; when I am giving good advice to someone, and they use it.

Continued...

Personality Number 7. The *Personality Number* comes from the Consonants in your Birth Name. 7's appear as folk who need their privacy. You often keep to yourself, but you are an acute observer of the human scene. When you share knowledge, you tend to speak with authority and have a good memory for detail.

People sometimes think that your silence means you are not listening, the 7's are always *tuned in*. People feel your spirituality, which is a large part of you, and while you don't seek them out, they often come to you.

Your **Power Name Number is 5!** ...This *Number* is derived from the Name you are *most commonly know by now*. Unlike your Date of Birth and Birth Name, which cannot be changed, we have control over the Power Name. Some folks even completely change their Name, such as when *Reginald Kenneth Dwight* became *Elton John!*

The Power Name Number 5 is a high-energy person. People can almost feel the electricity surrounding you. You can be an escape artist – it might be sex, drugs, alcohol, geography, or work. You are the celebrators of Life; you want to travel, to see what's out there. You like to make things beautiful.

You are the master party decorator – and parties can bring fascinating news, another favorite of yours, as you love a mystery and to dig for facts. Stay busy, and within reason keep those frequent flyer miles going!

Your **Intensity Number is a 9!** ...This *Number* is sometimes tricky to calculate, but generally refers to the *Number* that appears within your *Birth Name* the **most**.

The 9 is charitable and cares deeply for people. They have a strong sense of wanting to go places. They should travel, look at the World, keep a journal, write their thoughts down, and let go of old pain from their past.

Continued...

You mentioned having made a lot of “changes” in the last few years, and it makes a lot of sense, as two years ago you were in a *Personal Year of 5*. Five is *Change*, and folks often make changes in those years. Next year will be an **8-Year** for you, and you can realize the fruit of those changes...

You also mentioned having not fully manifested being “A Leader” despite your *Life Path and Destiny Number* being **1s**, and having an *Attitude 9 and Intensity Number of 9*. This is actually quite common. As folks read through the information on the various *Numbers* in their *Chart*, they will often identify with some parts, and for others they will think “...well that’s not me”.

These are tendencies and potentials. They can be latent or dormant, or the individual can even be *actively working against* their own potentials! It’s like paddling up stream, instead of going with the current. However, they can always change that!

You should definitely be doing your own thing, running the business, being in charge! ...And, as I mentioned in the beginning of this Report, you have a lot of 3, 6, and 9 *Energy ...Creativity and Communication*. You have these strengths and abilities.

Missing from your Chart are the 2, 4, and 8 *Numbers*. These are the sub-group of Numbers we call *The Business Numbers*. When someone is missing *Numbers*, I always suggest they try to balance things out by focusing on these areas...

You **do** have 4 and 8 in your Birth Name, however. I am more concerned with the *Number 2* being totally absent. That said, the 4 and 8 are more limited...

Four is **Structure**, and Eight is **Abundance**. If you haven’t fully realized all the *Abundance* in your *Life*, that you are wanting, this could be why. You’ll have to put extra effort in these areas; establishing more structure, and focusing on more abundance – What does that “look like” for you? Ask yourself, “What do I **really** want!?”

Continued...

The **Number 2** is *Relationships, Cooperation, Partnerships, Balance, and Helping Others*. So you should put **extra** “Focus” on those areas! 9 is the **Mother Teresa Number**. It is your *Attitude Number* and your *Intensity Number* (The Number that appears the most in your Name.) Nine is the Number of the philanthropist, the natural leader, the “Old Souls”. They don’t just care for other people, but for all of humanity!

The **Number 2** is very similar and represents putting those qualities (above) into action. So, as it is entirely *missing* from your *Numbers*, this could be hindering the full realization of the massive **9-Energy** in your Chart & Name...

This is where not just *Abundance*, but true **Fulfillment** will come from for you! Think about and Focus on your relationships with others, partnerships, helping others, cooperation...

Look at your skills and abilities, and your interests and passion(s). Now, what “**BIG Problem**” can you solve for other people? You are looking for where your skills and abilities intersect with a Big Problem you can solve, within your interests and passion(s).

This is where you will find meaning and fulfillment, which will naturally lead to more abundance.....

For clues, look at your *Soul-Urge Number*. Sometimes called “The Secret Soul Urge”, this is because unlike the *Personality Number*, from the *consonants* in your name – which everyone sees right away, the *vowels* reveal our “Soul Urge”, which we often keep secret from others. Yours is a **3** – re-read this:

My 3 soul is fulfilled when I am laughing, performing, writing, or using my creativity in a significant way; when I am giving good advice to someone, and they use it.

WOW! That was amazing! I hope you enjoyed your *Report* as much as I did making it! ...There's a lot of Information there, so if you have any questions, let me know!

***Blessings,
~Dax***
